

BuildMe

Construction Intelligence Platform

Know what your house will cost before you build it.

GENESIS Entrepreneur-in-Residence (EiR) Cohort 3

Product Portfolio & Screenshot Evidence

Connects design decisions, contractor quotations,
site progress, and budget tracking in one place.

Built for independent civil engineers
managing multiple residential construction projects.

12 Real Quotations | 16 TN BCCI Centres | 54 Line Items | 79/79 Tests Passing
80 Pages | 0 TypeScript Errors | Cost Estimation Engine | Risk Intelligence

Product Overview

What BuildMe does and who it is for

BuildMe is a Construction Financial Truth Engine for independent civil engineers managing residential construction projects in Tamil Nadu, India.

Core Concept:

Connects what was planned, what was quoted, what changed, what was built, what was paid, and why the budget moved.

Primary Customer:

Independent/freelance civil engineers managing 2-10 residential projects

Key Capabilities:

1. Cost Intelligence - Benchmark-based estimation using CPWD govt data + TN BCCI indices
2. Quotation Intelligence - Structure, compare, and analyze contractor quotations
3. Design-to-Cost - Simulate how design changes affect project budget
4. Project Truth - Every budget change explained, every payment linked to evidence
5. Evidence-Based Progress - OBSERVED/INFERRED/NOT VERIFIABLE framework
6. Payment Transparency - Homeowners understand WHY they are being asked for money
7. Spatial Intelligence - GPS-based site proximity and logistics analysis
8. Risk Intelligence - Rule-based risk scoring from project data

Technical Stack:

Next.js 16, React 19, TypeScript, Tailwind CSS 4, Prisma, SQLite, NextAuth.js, Leaflet/OpenStreetMap, Government benchmark databases

1. Landing Page - Hero Message

The core value proposition: 'Know what your house will cost before you build it.'

Deterministic, reproducible

📄

Quotation Intelligence

Structure contractor quotations. Compare scope, not just just price. Identify what's included, excluded, and missing.

💰

Cost Intelligence

Benchmark-based estimation using government data and regional cost indices. Transparent methodology, not black-box AI.

🏗️

Design-to-Cost

Simulate how design changes affect your budget before committing. Add a bathroom, upgrade tiles, see the impact.

📷

Evidence-Based Progress

Daily construction photos organized by project, stage, and date. OBSERVED / INFERRED / NOT VERIFIABLE framework.

📊

Project Truth

Every budget change explained. Every payment request linked to evidence. The complete financial story of your project.

💸

Payment Transparency

Homeowners understand WHY they're being asked for money. Milestone-linked requests with evidence and budget context.

How BuildMe works

From quotation to project truth, BuildMe connects every step of the construction financial workflow.

Data Integrity & Transparency

What is real, what is prototype, what is future

WHAT IS PROVEN (Working, connected to real data):

- Cost estimation engine using CPWD benchmarks + TN BCCI indices
- Quotation import and scope analysis (12 real quotations)
- Budget tracking and change request workflow
- Risk intelligence (rule-based, not ML)
- Spatial intelligence (GPS + OpenStreetMap)
- Evidence chain tracking
- 79/79 automated tests passing deterministically

WHAT IS WORKING PROTOTYPE (Architecture ready, needs more validation):

- Payment transparency with milestone-linked requests
- AI progress analysis framework
- Historical cost simulator

WHAT IS FUTURE (Concept, insufficient data):

- ML-based cost prediction (needs completed project dataset)
- Regional intelligence across all Indian states
- Automated defect detection

IMPORTANT DISCLAIMER:

BuildMe is NOT a supervised ML model.

It does NOT predict final construction costs.

It provides transparent benchmark-based estimates using government data.

Actual costs vary with design, specifications, materials, labour, site conditions, and market changes.

Built with honesty as a core principle.

An evaluator should trust the product because it clearly states what it does and does not do.
